outreach workers, health workers and peer educators working in government as well as non-government organizations. Some of the important packages are as follows.

A package (comprising of two sets of flashcards, five posters, five stickers, four leaflets and a guide book) for Injecting Drug users in the North-East. A health education package for the commercial sex workers (three sets of flash cards, one poster, one leaflet and a user manual). A package on HIV/AIDS containing three posters, a flip book, and a folder, for slum dwellers. For workplace education in Industry, an IEC package consisting of posters, booklets, stickers and a video set of options has been produced. An imaginative package containing training guides, posters, educational games and kits has been developed for street children.

The other print media developed for awareness were: posters, pamphlets and booklets on general information on HIV/AID/STDs, voluntary blood donation, timely treatment of STDs and developing a positive attitude towards those infected with HIV/AIDS.

Mortality Rate

816. SHRI BRAHMAKUMAR BHATT: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) the present Maternal Mortality Rate and Infant Mortality Rate, State and UT-wise;
(b) the measures taken to bring down the mortality rates;
(c) whether areas of child mal-nutrition and under-nutrition have been identified; and
(d) if so, the details thereof, State and UT-wise?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRI A. RAJA): (a) The Maternal and Infant Mortality Rate, State/UT-wise are shown in Statement-I. *(See* below)

(b) Under the Reproductive and Child Health Programme various measures are being taken. These measures includes immunization against six vaccine preventable diseases; appropriate management of cases of diarrhoea and acute respiratory infections, provision of

essentia] newborn case, promotion of nutritional status of children through advocacy of exclusive breast feeding and appropriate complementary feeding practices, prophylaxis against Vitamin 'A' and Iron deficiency.

(c) and (d) According to the results of National Family Health Survey (NFHS-II) (1998-99) precentage of prevalence of undernutrition among children under age of 3 years in our country is 47% State-wise Nutrition status is shown in Statement-II.

Statement-I
